

"Grow Together"

Residential Area Concept for Rintheimer Feld

More Living Quality for all Ages

VOLKSWOHNUNG promotes social balance and focuses on customer satisfaction. The living concept includes both energetic modernisation and improving living quality: More than 16,000 m² of open spaces are being revamped, paths renewed, seating areas installed and playing areas created – measures which will be completed by the end of 2017. The tenants' council founded in 2010 and a tenant service office enables direct local contact and is a contact point for questions and emergencies.

“Gut versorgt daheim” (“Well cared for at home”), a cooperation project between VOLKSWOHNUNG and the AWO Karlsruhe gemeinnützige GmbH (charitable limited liability company), offers a range of leisure, advisory and care services in the area. The Rintheim Children and Youth House and a trailer with many play and occupational opportunities are available for the younger generations, both financed by the VOLKSWOHNUNG.
